Re: Mitsubishi Electronics America, Inc., File No. 9423080

Dear Mr. Kiuchi:

The Commission has conducted an investigation involving Mitsubishi Electronics America, Inc.'s possible violation of Section 5 of the Federal Trade Commission Act, through deceptive failure to disclose the actual viewable image size of computer monitors in connection with advertising of cathode ray tube, or "CRT," size.

Upon further review of this matter, it now appears that no further action is warranted by the Commission at this time. Following discussions among Commission staff, industry representatives, and others, the Electronic Industries Association has advised us that it now is engaged in the development of an industry guideline aimed at "the alleviation of potential consumer confusion over computer monitor screen sizes." Numerous industry members have advised us that they expect to participate in that process and to adhere to such a guideline. Further, reflecting extensive consultations between staff of the Commission and of the Attorney General of the State of California, California officials obtained a final judgment of the Superior Court of the State of California<sup>1</sup> that sets out actual viewable image size

disclosure requirements intended to ensure the non-deceptive advertising of size of computer monitors. Accordingly, the FTC investigation has been closed. This action is not to be construed as a determination that a violation may not have occurred, just as the pendency of an investigation should not be construed as a determination that a violation has occurred. The Commission reserves the right to take such further action as the public interest may require.

Sincerely,

**Michael Joel Bloom**
